by Mark Broadie

The Keys to Making More Putts

1. Find the fall line.
2. The amount of break depends on a putt's angle to the fall line. Study the Putting Wheel.
3. Aiming for a spot beyond the hole gives your putt the best chance of falling in.
4. For short putts, the target should be farther from the hole on downhill putts, closer on uphill putts.
5. Don't leave putts under 15' short of the hole.
6. For long putts, focus on getting the ball to stop as close to the hole as possible.
